README
&
Description

Features

Wikis
Wikis host documentation for your repository.

Issues
Issues integrate lightweight task tracking into your repository. Keep projects on track with issue labels and milestones, and reference them in commit messages.

Get organized with issue templates
Give contributors issue templates that help you cut through the noise and help them push your project forward.
Set up templates

Sponsorships
Sponsorships help your community know how to financially support this repository.

Display a "Sponsor" button
Add links to GitHub Sponsors or third-party methods your repository accepts for financial contributions to your project.
Set up sponsor button

Preserve this repository
Include this code in the GitHub Archive Program.

Discussions
Discussions is the space for your community to have conversations, ask questions and post answers without opening issues.

Get started with Discussions
Engage your community by having discussions right in your repository, where your community already lives
Set up discussions

Projects
Projects on GitHub are created at the repository owner's level (organization or user) and can be linked to a repository's Projects tab. Projects are suitable for cross-repository development efforts such as feature work, complex product roadmaps or even Issue triage.

Pull requests
Pull requests allow others to suggest changes to your repository.

🔥 Strapi v5 & Next.js v16 Monorepo Starter

This is a ready-to-go starter template for Strapi projects. It combines the power of Strapi, Next.js, Shadcn/ui libraries with Turborepo setup and kickstarts your project development. We call it a **Page builder** for enterprise applications.

👀 Live demo

- UI - https://www.notum-dev.cz/
- Strapi - https://api.notum-dev.cz/admin
- **Readonly user:**
  - Email: user@notum.cz
  - Password: Secret-pass-55

📦 Tech stack

- Strapi v5 - Headless CMS to manage content
- Next.js App Router v16 - React v19 for building web apps
- Shadcn/ui - TailwindCSS based UI components
- TailwindCSS v4 - Utility-first CSS framework
- Turborepo - Monorepo management tool to keep things tidy

🚀 Getting started

Prerequisites

- Docker
- node 22
- pnpm 10
- nvm (optional, recommended)

Run dev (in 4 steps)

1. Clone this repository

```
git clone https://github.com/notum-cz/strapi-next-monorepo-starter
# checkout `main` branch (`dev` contains unreleased features and improvements)
git checkout main
```

Or click Use this template to create a new repository based on this template.

2. Install dependencies

```
# in root
# switch to correct nodejs version (v22)
nvm use
```
